RDS Pistol Zero Confirmation Target

Directions: Place target at 10 Yards from the shooter and fire 3 controlled shots at the target. If the gun is properly zeroed and the shooters fundamentals were good you should have 3 rounds touching each other. Shoot it once and look, if the shot placement is good shoot it one more time to confirm. If its not shoot it again and then make adjustments as needed. If you shoot it from a rest confirm it in a standing position also.
